SOLIDS TREATMENT
CONTRACT MANUFACTURING
ANALYTICAL SERVICES

SOURCING AND DISTRIBUTION

Products from notable national and international chemical producers are prepared according to requirements in our facility and delivered to our customers using the logistics hub in Duisburg.

Products can be shipped via truck, tank car, isotank, box container or tank ship. Tank ships can be unloaded at our own mooring site on the Rhine. This way we can handle large quantities of raw materials and intermediate goods for our distribution.

LIQUID TREATMENT

When it comes to liquid treatment and handling, it's all about filling, filtration and warehousing of liquid products. With a capacity of 25 tonnes per hour, we fill fluids on several filling lines.

We also offer loading and handling options for packed or bulk products.

TANK STORAGE

Packed or bulk products can be stored in warehouses or tanks. 30 tanks with a total capacity of 25,000 cubic metres (normal steel and stainless steel tanks) are spread across the 62,000 square metre company grounds.

The tanks are insulated and heatable. If required, they can be overlaid with nitrogen. Filling can be done directly from the tanks into drums or IBC.

SOLIDS TREATMENT

Our solids treatment and handling equipment processes free-flowing bulk materials.

We have warehouses with a storage capacity of up to 1450 tonnes for interim storage. We are approved to store substances in WHC classes 1-3.

CONTRACT MANUFACTURING

From idea to finished product, we are there to guide you. We provide complete handling solutions – from raw materials sourcing to warehousing and distribution. Production takes place on state-of-the-art equipment considering customers individualised requests for formulation.

Packing stations and filling equipment that have direct connections ensure variable assembling of the trading units according to customer specifications. We filter out any suspended particles from your product using a range of different filter aids.

ANALYTICAL SERVICES

State-of-the-art technology and experienced employees: our laboratory has an excellent reputation among the experts as an independent service provider in analysis of tensides, petrochemical products, liquid gas, fuels and biofuels.

*Don't hesitate to contact us -
we would be glad to discuss your needs and
put together a personalised service package!*
